PUBLIC NOTICE **DANGEROUS ICE CONDITIONS**

On 1/13/2021 we received multiple notices and complaints that a contractor was breaking ice on Pistakee Lake from Eagle Point to the mouth of the Fox River on Pistakee Lake creating a dangerous condition. It is important to know that there are many areas on the Lakes and River that are not frozen or possess thin ice that present dangerous conditions. There are great risks any time folks venture onto the ice no matter where one is and extreme caution should always be taken if one decides to take this risk. Please maintain added caution by the path made by the barge as highlighted on the map below with the orange line. **Remember, there is open water on the Fox River and its surrounding Lakes in many areas throughout the winter months. Always maintain extreme caution and keep safe! Thank you!**
